Subject: Green rovidence Wind I, LLC, please submit to all cpd board members

CPC Director and board members,

RE: Green Providence Wind

As a providence resident, and Chair of the Washington Park Association, and a resident of Washington Park , I am 100% in favor of the additional three wind turbines to be located within the Maritime Waterfront District. This addition is important to full fill our ' Wind Energy' directive that will create non toxic energy for 'future' generations.

I am compelled to say, that, 'an option' for the future, should NEVER stalemate an existing, positive, permitted development, in my opinion.

I sincerely hope that the board sees the very positive nature of this 'wind energy system', and that the variance is agreed upon, by the CPC, thus allowing this important development, for the residents of Providence to move forward.

Sincerely,

Linda Perri

Washington Park Association
