Mr. Marc A. Greenfield, Chair
City of Providence Zoning Board of Review
444 Westminister Street
Providence, RI 02903

RE: Item # 1 of Continued Matters: Green Providence Wind I, LLC

Dear Chairman Marc A. Greenfield

It is without hesitation that I fully endorse the application for the three turbines proposed by Green Providence Wind I, LLC. I was disappointed to learn that only two of the three turbines were approved at the last hearing and tonight's hearing will consider the third turbine.

Supporting this renewable energy project is an important message for not only the port of Providence, but also the residents of the Washington Park Neighborhood and South Side Community. Historically, these neighborhoods have advocated to cease the appearance as a "scrap district" and home to "fossil fuels".

I can enthusiastically support the importance of this proposal as my constituents have great interest in projects that align with recycling and renewable energy.

Sincerely,

Pedro Espinal
Providence City Council
