

To whom it may concern

I am writing this letter to speak on behalf of my 2000 patients who are under my care at Chafee clinic .

I am a family medicine physician who has been working with PCHC for over 3 years.

I care for the most vulnerable community in Rhode Island. I have a lot of patients who suffer from asthma and chronic respiratory conditions. At Chafee we been working hard to control and improve the health of our respiratory patients.

I feel that by opening this asphalt plant close to Chafee will not only put the staff at risk , but also our greatly compromise the wellbeing of our vulnerable community.

Please reconsider the location of the plant .

Sincerely

Zein Farhat , MD
