

Draw a Megalodon Shark

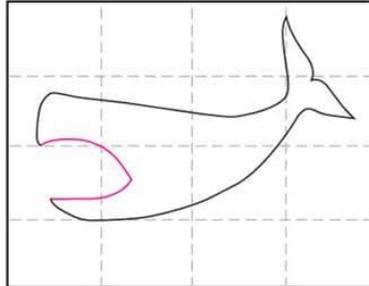

If you think this looks like a tricky creature to draw, then be sure to fold your paper to get yourself started with the designated guidelines, or just draw them lightly with a pencil. It's a huge help in getting all those curvy lines in the right place. Make a 4x4 grid to guide your drawing line placement.

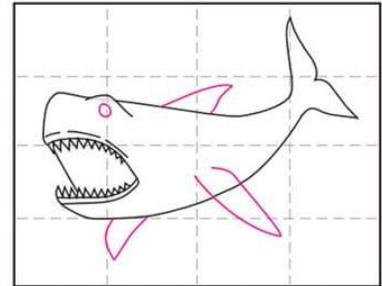

1. Draw the top of the body.

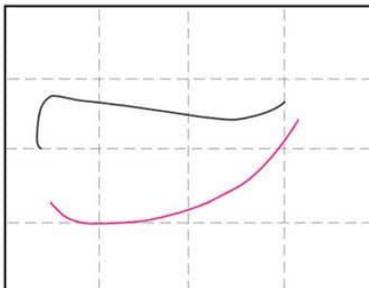

4. Draw the mouth.

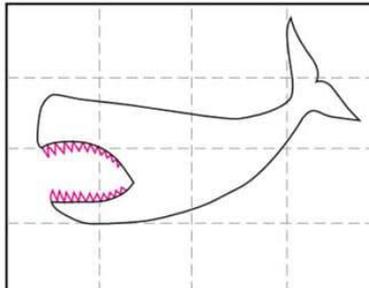

7. Add eye and fins.

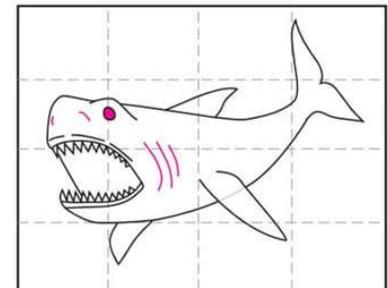

2. Draw the bottom of the body.

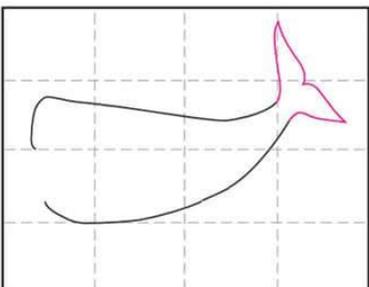

5. Add the teeth.

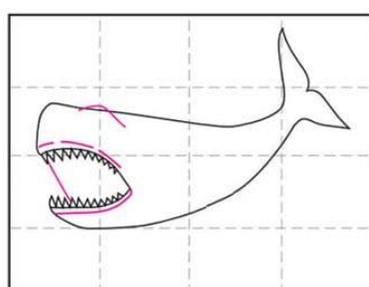

8. Finish eye, nose and gill.

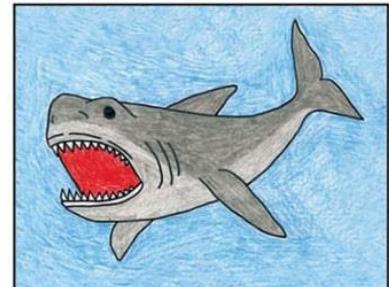

3. Add the tail.

6. Finish the mouth. Add a bump for the eye.

9. Trace with marker and color.
