

Make a Polar Bear

Materials:

Cup or toilet paper tube

White paper

Black paper or black marker

Scissors and glue stick or tape

Polar Bear template

Directions:

Print the template and cut out the shapes.

If you can't print it, you can just use the template as a guide and cut those shapes out of any white paper you have!

Attach the arms around the back of your Polar Bear body so the paws reach around to the front – use glue or tape to stick them on the back.

Color the nose shape black or use it to trace that shape onto black paper and cut it out of the black paper. Attach it to the Polar Bear head. Draw a mouth and eyes.

Attach the ears onto the head with tape or glue.

Attach the head to your Polar bear Body with tape or glue!

Enjoy your stand-up Polar Bear friend!
