---

I am writing to urge the zoning board to DENY the permit application from Narragansett Improvement Co. (what an ironic name)

Rather than continue to allow the company to store hazardous materials on the shoreline of Narragansett Bay, (which has already been sited for violations), we should be pushing for the total removal of these toxic waste products. They impact the health of the bay, of the local residents and are a dismal use of prime waterfront real estate.

Regards,

Olivia McCullough
