

Paper Plate Flamingo

Supplies needed for flamingo craft:

1. Construction paper
2. Paper plate
3. Tissue paper
4. Popsicle sticks (4)

Flamingo craft directions:

1. First step is to color your paper plate (preferably pink but you can use any colors you would like).
2. Trace your hand on the tissue paper, make sure there are a few layers of tissue paper so there will be multiples when you cut it out.
3. Cut out the tracing of your hand.
4. Then, take a glue stick and layer on the tissue hands so it covers most of the paper plate acting as the flamingo's feathers.
5. Next, color your Popsicle sticks, these will be the flamingo's legs. Put these aside for the time being.
6. Now, to create the flamingo's head you can use my cutout that I made or feel free to make your own! Make sure the neck has an "s" shape and a long black beak. I recommend using a heavier style paper so the head stands straight up and won't fall. Then tape the head to the back of the paper plate, placing it where you would like.
7. Finally, tape your 2 colored Popsicle sticks to the back bottom of the paper plate, opposite side of the head. Tape or glue the remaining 2 Popsicle sticks to the bottom of the other sticks, one on top of the other creating the long-extended legs of the flamingo.

Now enjoy! You can even stick the flamingo into a potted plant as a decoration if you like!
