10.0 Work Items

Item #1 Inject Ash Trees with Insecticide

Work: Under this item the Contractor shall perform trunk injections of ash trees to control for Emerald Ash Borer using TreeAzin®, in accordance with the plans, specifications and directions of the City Forester.

Product and Storage: The contractor shall be responsible for purchasing, storing, and using TreeAzin® for ash tree treatments. The contractor is required to submit the product label and MSDS prior to commencing work, and shall notify the City where the chemical will be stored during the treatment period.

Method: TreeAzin® shall be injected into ash trees according to the product label.

Injections shall be made into the trunk at the root flare, or as close to the root flare as possible. The contractor shall use 15/64" high helix drill bits for drilling injection holes. In order to maintain high efficiency of drill bits, the contractor shall dispose of old drill bits after every 100 inches of DBH (diameter at breast height). (BioForest provides 1 free drill bit per 2 liters (2,000 ml). This equates to 160" of DBH at the 12.5 ml/inch rate to ensure sharp drill incisions.) The injection hole shall be .75 inch to 1 inch deep, in order to maximize the delivery of TreeAzin® into the tree.

The product shall be injected into ash trees using the EcoJect Tree Injection system or equivalent as approved by the City Forester. The contractor shall be responsible for cleaning the injection system daily to maintain high efficiency.

TreeAzin® shall be injected at a rate of **12.5 ml/inch of DBH** due to the fact that EAB has been discovered in the City of Providence.

Signage: The contractor shall attach signage to ash trees not less than 48 hours in advance of treatment for EAB. Signage will be provided by the City Forester. The contractor shall remove signage 48 hours after treatment. Treatments on school grounds and in parks may require additional notification, at the direction of the City Forester.

Ash Tree Locations: The contractor will be provided with an address list and map of ash tree locations upon award of contract. Selected trees will be along City streets, in City parks, and on public property and will be readily accessible. Trees will be pre-selected by the City Forester based on a ranking system considering size of tree; condition; site considerations such as infrastructure conflicts; prominence and neighborhood equity considerations; and other criteria. All trees will be between 12" and 40" diameter.

Schedule: The contractor and the City Forester shall agree to a schedule of work to be performed based on Growing Degree Days (GDD). Treatment is expected to occur mid-May through June 30, after trees have leafed out.
