Services are delivered by more than 5,000 employees across City Departments, Providence Schools, and the Providence Water Supply Board. The Smiley Administration aims to be the "best run City in America" and critical to achieving this goal is having a modern technology platform to facilitate our municipal courtrooms (Probate, Housing and Municipal).

The City of Providence is seeking proposals from qualified vendors for an outstanding Court Management System. Our courts are responsible for managing court processes and activities, and we require a comprehensive system to streamline our operations and improve our efficiency. We are seeking proposals from vendors who have experience in developing and implementing Court Management Systems and have a proven track record of successful implementations. The purpose of this RFP is to solicit proposals from qualified vendors and select the best proposal that meets our requirements as detailed below. - 3. Calendar Management: The ability to schedule courtrooms, resources and judges as well as ability to share scheduled court appearances with council.
- 4. Docket Management: The system should be able to create and maintain a docket of all cases, including scheduling of hearings, court appearances, and other important dates. The system should allow multiple user groups to view the docket calendar.
- 5. Financial Management: The ability to manage court finances, including fee collection (cash/check/echeck/money order/cashiers check/credit card)payment processing, and accounting.
- 6. Search Function: The system should provide a robust search function that allows users to search for cases, documents, and other court-related information using various criteria, such as case number, party name, hearing date, and more for both the public and internal users.

- 7. Reporting: The ability to generate various types of reports, including case statistics, court performance, financial reports, and management reports.
- 8. Dashboard: The system should have a customizable dashboard to give all system users a quick glance of relevant and current activity.
- 9. Security: The system should provide robust security features to ensure the confidentiality and integrity of court data.
- **10**. Integration: The system should be able to integrate with other systems, such as document management systems, e-filing systems, and other court-related software.
