

Reuse your electronic devices, and when they need to be disposed, make sure they are disposed of properly to a licensed facility

# E-Waste

You wouldn't throw nuclear waste in the trash  
**PUT E-WASTE IN ITS PLACE**

*E-waste represents 2% of America's trash in landfills, but it equals 70% of overall toxic waste. The extreme amount of lead in electronics alone causes damage in the central and peripheral nervous systems, the blood and the kidneys.*

*The nation now dumps between 300 million and 400 million electronic items per year, and less than 20% of that e-waste is recycled*
