Community Response:

- **Vigils:** In the aftermath of a tragedy, some communities have organized vigils to remember the victims and to provide a space for members of the community to express their sorrow for the tragedy. Best practice from our experience is for these activities not to be political in nature, and to be treated as a thoughtful remembrance gathering and an opportunity to show support to families. The families of victims may or may not choose to participate, and that is their decision.
- **Support for Victims' Families and Witnesses to the Shooting:** After a traumatic event, individuals respond in any number of ways. Many people are able to recover from their trauma using natural supports they have available to them. Others, however, may experience intense thoughts and feelings that last a long time.
