BID PACKAGE SPECIFICATIONS

1. Overview

The City of Providence is seeking a contractor to dewater and clean 490 feet of a 38" former CSO/current stormwater pipe at Public Street between Allens Avenue and the Providence River in Providence, Rhode Island, including the structures these pipes connect to. The goal is to enable a complete video inspection of the pipe to inform decisions concerning future pipe maintenance or replacement. A prior video inspection was attempted at the site, but efforts were abandoned when the pipe was found to be under water and that it contained sediment and debris, which blocked access by the camera equipment.

The limited footage from the earlier effort provides some insights into the general pipe conditions:

1. The brick is in relatively good condition considering the age of the installation.
2. The brick surface has areas of surface spalling.
3. There are some areas where larger spalling has occurred.
4. Some bricks are missing; it is assumed that they are in the pipe invert.
5. There are some areas of what looks like grit deposits up to 8" deep along the pipe invert.
6. There is not video for the entire length of the pipe. Deposit depths may vary along the length.
7. Infiltration evidence can be seen from past events (white calcified deposits). Active infiltration of dripping water can also be seen in the video.

2. Scope of Work

The stormwater pipe terminates to an outfall on the Providence River, which is tidally influenced and has an effect on water levels inside the sewer main. The awarded contractor shall plan operations around tidal variations and rain events as needed. The City is not responsible for additional work required from tidal or rainfall events.

Dewatering

1. Plug the 42" DI pipe to prevent backflow from the Providence River. The manhole closest to the outfall (DHM A) will need to be vacuumed to remove invert sediment and miscellaneous sunken and floating debris (e.g. water bottles) prior to the placement of a pipe plug into the 42" downstream DI pipe.
2. Run dry/self-priming trash pumps for dewatering. Initial dewatering shall begin from DMH A to the sewer manhole identified on the plan. The sanitary manhole to be used for discharge is approximately 4' in diameter, with a 6" pipe discharging to the north to a sewer main on Allens Ave.
3. Once the water level is found to be dropping, dewatering should be performed from DHM D which can be discharged to the street gutter line. Contractor shall provide erosion control measures and flow spreading along the coastal barrier to prevent erosion.
4. Pumps shall be self-priming and capable of passing solids to avoid clogging during work. Pumps shall be capable of running dry to enable full dewatering of the pipe system. Contractor may place removable dams in the pipe to create reservoirs as needed. Dams shall be removed at the conclusion of the work. Contractor shall provide generators, compressors, and all other equipment needed for the work.

Cleaning

1. Jet truck decanting can be performed into the sanitary manhole. Water is available for use from the hydrant located at the project site. Contractor shall provide a water meter and backflow preventer and document daily water use. City will pay water supply charges.
2. Jet truck debris to be emptied into a contractor prepared dewatering station at the City DPW property on Allens Ave. The city will dispose of the debris.
3. Concrete, bricks, and other solid materials shall be disposed of by the contractor in accordance with applicable disposal requirements. Removal of debris may involve personnel entry to remove solids. Contractor is responsible for compliant OSHA permit entry and for personnel safety.

Closeout Report

1. Provide a written closeout report documenting existing pipe conditions and still pictures of damaged areas and of evidence of active and past infiltration.
2. Provide CCTV raw coverage as the work progresses and of the final cleaning.

3. Proposals & Scoring

Proposals shall include:

- 1) Baseline Requirements
 - a) Complete and/or sign all bid forms, MBE/WBE forms/waivers, and the addenda acknowledgement form. Bidders that fail to complete these requirements will be disqualified.
 - b) Provide a concise summary of your firm, including the primary contact person for the RFP, company name, address, telephone number, and email address, signed by the person authorized to bind the organization.
- 2) Project Approach
 - a) Demonstrate your understanding of the requested project.
 - b) Provide a project schedule.
 - c) Provide a list of the permits/approvals/inspections that will be required.
- 3) Experience
 - a) Provide summaries of your organization's work on two projects of similar scale and complexity.
 - b) Provide the contact information for each of the two examples to be used as references.
 - c) Provide the resumes of key project personnel that demonstrate their qualifications to conduct the requested scope of work.
- 4) Cost
 - a) Bid Price
 - i) Provide an itemized project budget that demonstrates how you arrived at the total bid price.
 - b) Unit Pricing
 - i) Provide a per day unit cost to be applied if an additional day(s) is required to complete the scope of work due to unforeseen challenges. The per day cost should include all costs to maintain the dewatering and cleaning operation, including, but not limited to equipment, mobilization, and labor.
 - ii) The per day fee will only be applied in the case where the contractor has provided sufficient documentation to justify the need for additional time on the project. The City and its OPM will have the sole discretion to determine whether additional time on the project is justified.

Proposals will be scored as follows:

Category	Potential Points
Bid Forms, MBE/WBE Forms, and Signed Addenda	T/F
Project Approach	20

18. If any term or provision of this Agreement, or the application thereof to any person or circumstance shall, in any extent, be invalid or unenforceable, the remainder of this Agreement shall not be affected thereby, and each term and provision shall be valid and enforceable to the fullest extent permitted by law.
